ADVANCED SUPPRESSION

Using our new (2015) PATENT-PENDING subsonic and supersonic 300 Blackout Barrel and Gas system, the model: MGA SAW™ 300 BLK, coupled with a specially design MG sound suppressor, especially those from OSS or GemTech, this model of machine gun is **VIRTUALLY SILENT.**

MULTI-CALIBER RECEIVER

All MGA SAW™ Gen 3 receivers are multi-caliber and can accept calibers including: 6.8mm SPC, 7.62x51mm, 5.56x45mm, 7.62x39mm and more.

IMPROVED BARREL LIFE

Unlike old fashioned chrome-lined barrels, MGA SAW™ barrels offer greater longevity due to the use of Nitromet (Nitrocarburized/QPQ, aka Melonite).

IMPROVED BUTT-STOCK CHOICES

Due to the use of an improved internal recoil buffer, all MGA Gen 3 receivers can use ANY M4-style of butt-stock, which most operators prefer. The MGA SAW™ can also use any FN MINIMI® stock.

INTEGRATED BATTLE OPTICS

The MGA SAW™ is offered with US-based Trijicon optics; one of the best battle-optics in production.

300 Blackout AMMUNITION SUPPLY

300 BLK uses M27 links and is readily available.
